

Year 4 recorded the temperature in the playground over 12 hours.

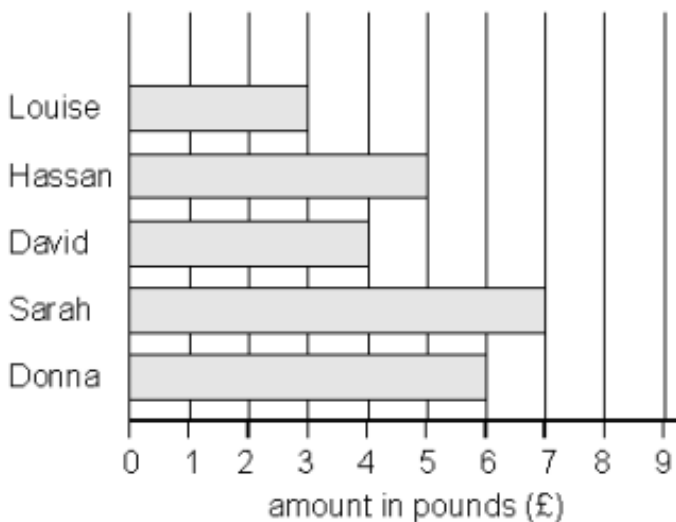

1) At what time was the temperature highest? Why could this be?

2) The lowest recorded temperature was at 9pm. What was it? Why could this be?

3) Describe the events of the line graph in your own words.

Five children collect money to plant trees . Here is a bar chart of the amounts they have raised so far.

4) Who has raised the most and who has raised the least money? What is the difference between these amounts?

5) How much more does the group need to raise until they reach £100?
